Fatiha Syed

Information Systems & Integration Analyst | Technical Project Delivery
fionasyed2004@gmail.com | 469-363-5950 | Dallas, Texas | U.S Citizen

PROFESSIONAL SUMMARY

Systems and Technology Solutions Professional with comprehensive experience spanning enterprise application integration, data conversion and migration testing, technical project delivery, and SDLC governance. Demonstrated expertise leading data mapping, RESTful API integrations, and complex SQL data validations while establishing structured risk mitigation frameworks (FMEA/RCA). Skilled in managing cross-functional technical workflows across vendors, developers, and district stakeholders, tracking project milestones, and supporting ITIL-aligned Incident and Change Management processes. Adept at translating complex functional requirements into clear technical specifications, user acceptance testing (UAT) scripts, and executive milestone dashboards to deliver robust enterprise solutions on schedule and within scope.

EDUCATION

University of Maryland Global Campus, Adelphi, Maryland | ***Master of Science - Systems Engineering***
University of Texas at Dallas, Richardson, Texas | | ***Bachelor of Science - Computer Science***
Collin College District, Frisco, Texas | | ***Associate of Science – General***

TECHNICAL COMPETENCIES

Systems Analysis & Integration: Enterprise Systems Architecture, Data Mappings & Transformations, RESTful API Integration, Flat File Processing, Business Process & Functional Gap Analysis, SDLC, ITILv4 Incident & Change Management

Project & Quality Governance: Project Work Plans & Milestone Tracking, Agile/Scrum & Kanban, Risk & Issue Governance (FMEA/RCA), User Acceptance Testing (UAT), Data Migration & Conversion Validation, Defect Triage & Hypercare

Database & Technical Stack: SQL (SQL Server, Stored Procedures, Complex Queries, Triggers, Views), Python, Postman, Linux/Unix, Git/GitHub, AWS (S3, RDS, Lambda), Azure Cloud Solutions, Active Directory / IAM

Project & Reporting Tools: Jira, Confluence, Microsoft Project/Excel (Milestone & Resource Dashboards), Smartsheet, Monday.com, SSRS & Crystal Reports, Visio (Workflow & Architecture Diagrams)

PROFESSIONAL EXPERIENCE

November 2025 - Current **Bhanzu** *Mckinney, Texas*

System Integration and Project Specialist

- ❖ Lead technical coordination, functional requirements analysis, and delivery milestone tracking for core enterprise scheduling, student management, and operational systems.
- ❖ Design and maintain end-to-end data integration pipelines across REST APIs and distributed database systems, executing source-to-target field mapping, data translation, and clean-up routines.

- Implement structured Failure Modes and Effects Analysis (FMEA) and risk logs to identify operational bottlenecks, third-party vendor interface delays, and technical failure points prior to deployment.
- Develop complex SQL Server queries, stored procedures, and automated data validation scripts to audit system integrity, extract operational reporting data, and resolve production defects.
- Facilitate User Acceptance Testing (UAT), release cutover planning, and post-production hypercare support; document standard operating procedures and deliver end-user application training.
- Maintain accurate project documentation, technical diagrams, and executive-ready status reports communicating scope health, deliverable timelines, and corrective actions.

November 2024 - May 2025 **Radus Software & Technology** *Washington, DC (Remote)*

Applications & Data Integration Analyst

- Supported enterprise data migration, software integration, and conversion initiatives across third-party configurable platforms and distributed database environments.
- Authored functional specifications, interface diagrams, and technical data dictionaries by translating complex stakeholder requests into actionable development work plans.
- Developed automated Python and SQL test scripts to validate data staging integrity, schema consistency, and business logic execution during system cutovers.
- Coordinated cross-functional Agile release meetings, tracked Jira defect triage queues, and managed ITIL-aligned change tickets to ensure system stability and SLA compliance.
- Conducted structured pre-release risk assessments and Root Cause Analysis (RCA) on batch execution anomalies, establishing rollback triggers and operational failover procedures.

May 2024 - August 2024 **MaxSoft IT** *Frisco, Texas*

Systems Analyst

- Analyzed system transaction logs, database queries, and backend API responses to diagnose root causes of batch synchronization errors and interface timeouts.
- Created technical workflow dependency diagrams, data mapping documentation, and test verification matrices for cross-functional engineering teams.

UTDesign Capstone - Enterprise Systems Integration and Delivery Framework

Project Delivery Lead | August 2024 - December 2024

- Directed the project work plan, critical path dependencies, and deliverable milestones for an integrated multi-tier software and data delivery initiative.
- Formulated comprehensive test procedures, configuration controls, and FMEA risk models to validate data integrity across subsystem interfaces.
- Delivered executive project updates, architecture schematics, and comprehensive closeout documentation ensuring operational handover readiness.
